Grow

For a growing company, data analysis is of prime importance as it facilitates intelligent business decisions. It is also important for a company to establish a goal as to how the analytics will be used; once a goal is set, the organization can figure out the process to get there and also the tools which will make the journey smoother. ITOrbital can help you use SAP Analytics (BI/BO/HANA) to attain great results with profound ease.

Current Market Challenges are

Starting a business intelligence (BI) strategy can be a daunting task for organizations – big or small. It is a very complicated area that needs a lot of skill. There is also a lot of pressure for delivering real-time results in a cost effective manner

Data growth: Data is growing at a very fast pace and is expected to grow by almost eight times in the next five years.

BI overload : Every organization is facing a huge issue with data overload. The data volume and content is getting cluttered.

Self help : Analytics doesn't need a lot of IT involvement and in fact at times needs no IT resources.

BYOD : Businesses today expect and need the real-time analytics to be accessed from everywhere and at anytime, most importantly on all kind of mobile devices.

Data Visibility : Easy access to the data is the key feature of BI. Clients expect to access and visualize the data that would help them understand the implications.

Features

- SAP HANA Cloud platform helps in enabling the user to take effective decision real-time
- Discovering and predicting the trends becomes easier with SAP BI/BO powered by HANA
- Helps in adapting with the changes taking place in the source system
- By building solutions on HANA Cloud Platform the data is safe and secured on cloud

Why SAP HANA ?

- Manages massive data volumes at very high speeds(10-1000x faster than other databases like Oracle, DB/2 etc.)
- Gaining insights from any data i.e. structured as well as unstructured
- Helps to unlock the true power of predictive and complex analysis
- Step up to one of the most advanced cloud platform(HANA cloud platform)
- Interact with any mobile devices with the help of SAP HANA(e.g.-any BYOD)

Using Cloud for SAP Analytics

SAP Cloud combines planning, business intelligence, and predictive analytics in a single cloud-based solution. SAP Cloud for Analytics simplifies financial planning and analysis (FP&A) and gives you the ability to analyze data and collaborate in the context of your plans in real time.

- Discover, visualize, plan, and predict in one product versus separate point solutions
- Experience a new and completely different product designed for the way you actually work
- Benefit from a highly reliable solution built natively on the SAP HANA Cloud Platform
- Go live quickly and affordably with a subscription-based SaaS analytics deployment
- Take advantage of native integration with on-premise applications and data sources

How can IT Orbital help ?

- Our mission and vision is to provide SAP Analytics solutions for SAP HANA, SAP BW and SAP BI/BO. We provide end to end solutions for Development, Support, Upgrade Projects, and also provide SAP Analytics training.
- All the Development phases of the project canbe done jointly with shared responsibilities between Clients and IT Orbital team.

- Our SAP team along with our clients can mobilize personnel at Clients locations for faster deployment

- Our team will work closely with the Client's IT team for integration, landscape setup and maintenance.

- We would be actively involved in the development activities which would lay a strong foundation for the forthcoming support phases.

We Provide

- **Comprehensive services:** We take a modular approach to design, development, rollout, testing and support, leveraging industry best practices. Our solutions are secure, scalable and maintainable.

- **Quality check:** We help consumers in assessing the optimum scenarios in which they can have a beneficial business altogether.

- **Development skills :** Our services are painstakingly conceptualized, planned, designed and executed by a team of highly skilled design experts, programmers and project management specialists.

- **Constant improvement:** Our zeal for improvement prompts us to invent robust procedures and methodologies in niche technologies for mobility, e-commerce and real-time analytics.

- **Corporate training:** We are also capable of conducting corporate training for our customers giving them in depth knowledge of the usage of SAP products

ITOrbital SAP Center of Excellence (CoE)

- Co-operative development
- Quick personnel mobilization to client's location
- Close co-operation in landscape set up for faster UAT
- Post development support and training
