MUNICIPAL Management System (MMS)

MMS - ITOrbital's e-Municipality Information Management system is a centralized integrated application that proves beneficial to Government and citizens alike. In sync with the government's initiative to provide Citizen Centric Services through e-governance, ITOrbital has successfully developed and implemented Municipality Management System for a municipality that would automate the municipal affairs, which includes online collection of taxes, issuing of trade licenses, uploading and downloading the important forms, publishing news, notice, publication, tender etc. Feedback, complaint, grievances and suggestions are also submitted through this interface. All kudos to the system's highly interactive feature, important transactions, online application procedures, any ongoing project status and report generation process can be handled smoothly and efficiently. It basically aims at facilitating governments in delivering citizen centric services on anytime, anywhere basis.

MMS entails the following main modules:

- Financial Management System
- Payroll Management System
- Property Tax Management System (PTMS)
- Certificate of Enlistment (CES)
